

Authentication System:

This is the authentication system where you can either create your account or sign in to a pre-existing one.

- To Sign In, enter your email address and password in their respective fields. Remember to use the same email address and password you used to sign up
- To Sign Up, enter a valid email address, a password that is 6-30 characters long and has at least one uppercase letter and one symbol, and a username that can contain any combination of characters as long as it is 40 characters long.

Additionally the Text boxes will display a green checkmark or a red x if the information you have entered is not valid. This can be seen in the images below. As the username can contain any combination of characters it will not display these.

The image displays two mobile application screens for account creation, illustrating validation feedback.

Left Screen (6:53): The form contains the following inputs:

- Email: (Invalid, marked with a red 'x')
- Password: (Invalid, marked with a red 'x')
- Username: (Valid, no mark)

Below the inputs is the text "Already have an account?" and a "Create Account" button.

Right Screen (6:55): The form contains the following inputs:

- Email: (Valid, marked with a green checkmark)
- Password: (Valid, marked with a green checkmark)
- Username: (Valid, no mark)

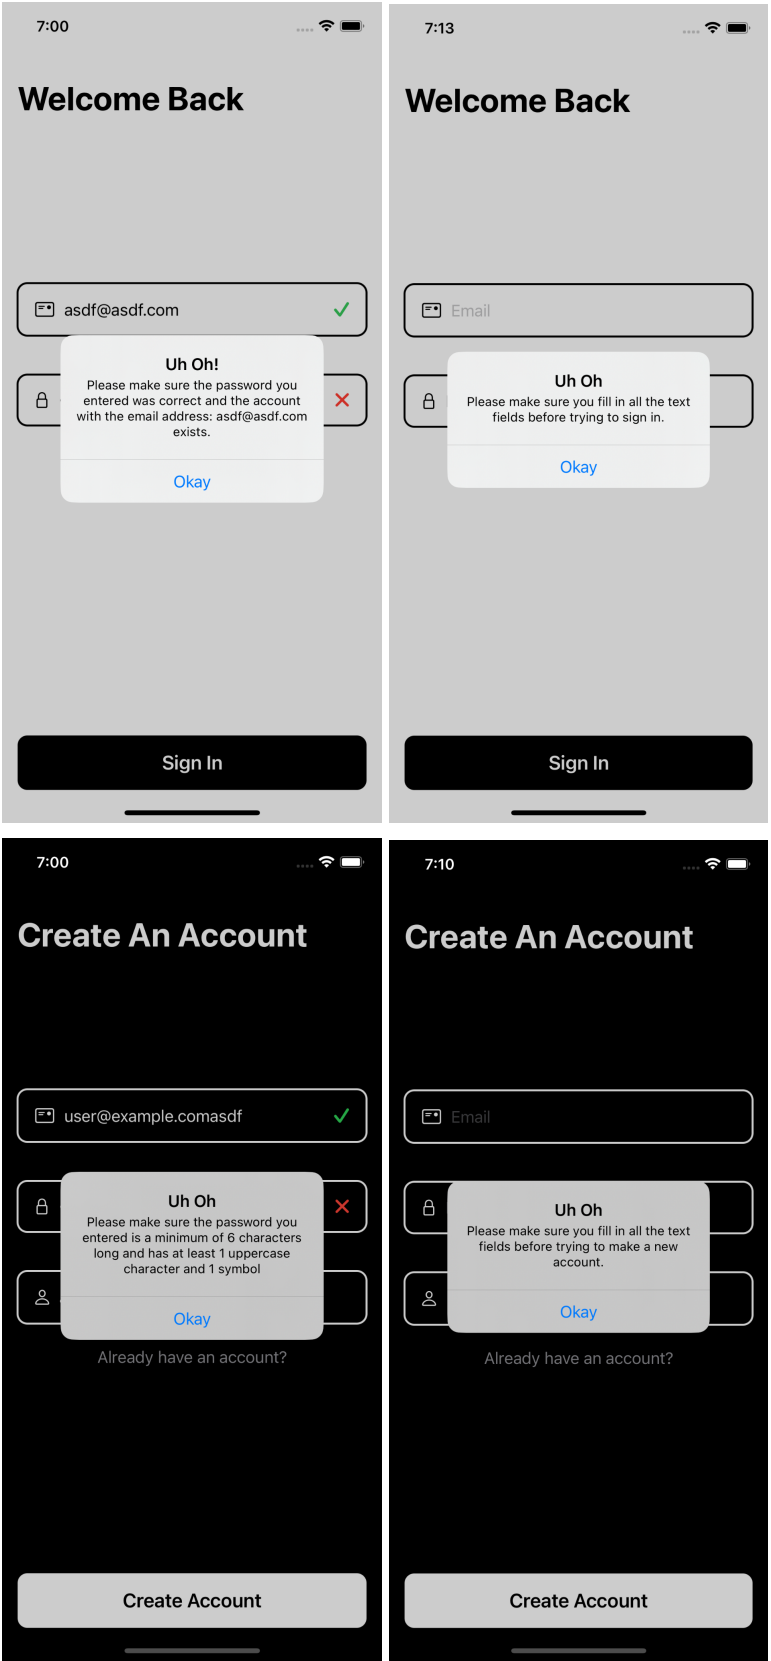

Below the inputs is the text "Already have an account?" and a "Create Account" button.

Annotations:

- Red arrows point from the text "These show x marks as the information entered does not follow the required specifications." to the red 'x' marks on the left screen.
- Red arrows point from the text "These show checkmarks as the entered information follows the required specifications" to the green checkmarks on the right screen.

(Note: The Manual Continues on the Next Page)

Further the system will display alerts to remind you if the information you have submitted is incorrect.

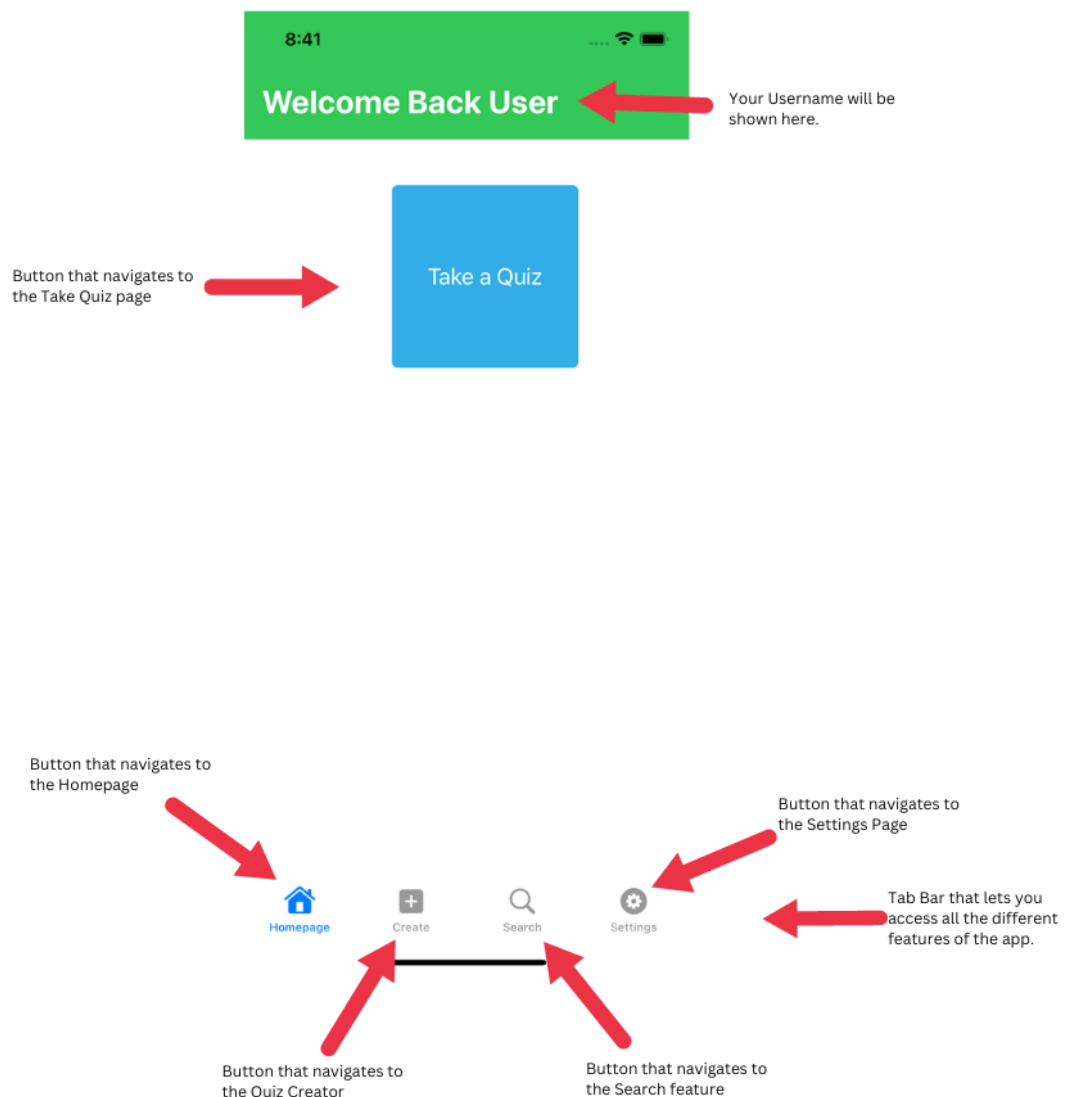

Homescreen:

After logging in, you will be redirected to the homescreen. From here, you have several options:

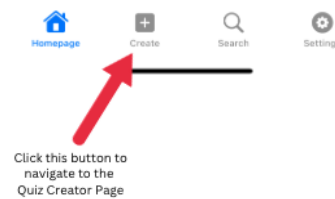

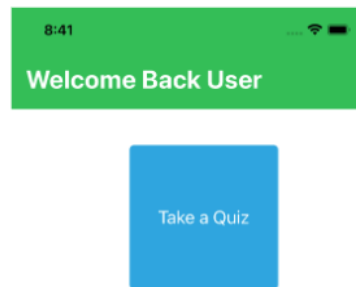

1. Click the blue button in the centre to access the Take Quiz page, where you can choose from quizzes created by other users.
2. Tap the Create button in the tab bar at the bottom to go to the Create Quiz page, where you can create your own quiz.
3. Navigate to the Search page by using the designated button to search for quizzes.
4. Access the Settings page to log out of the application.

Remember, you can switch between pages using the tab bar at any time, even during a quiz. However depending on where you took the quiz from the homescreen or search view will be unavailable.

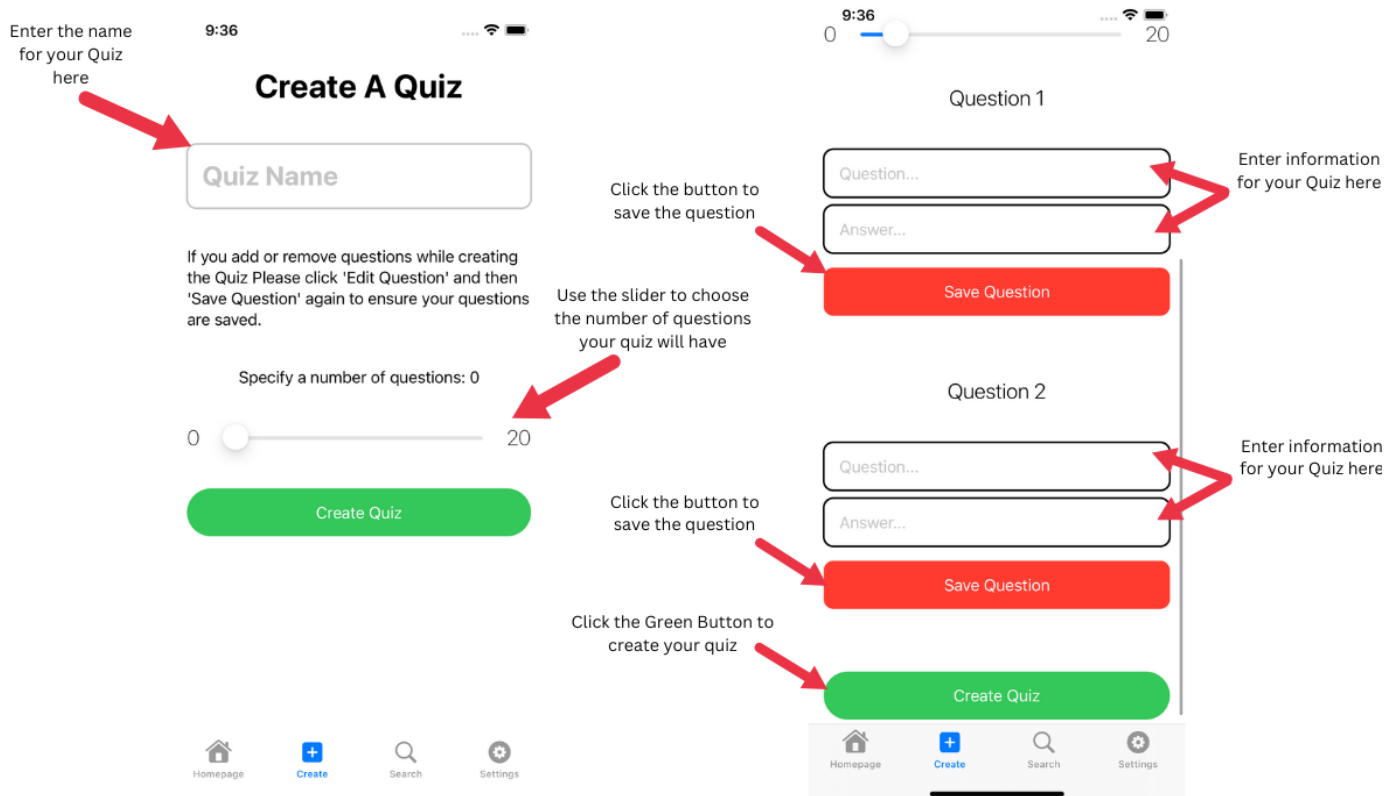

Quiz Creator:

From the Homescreen if you want to create your own Quiz you will need to click the Create button located at the bottom of the screen which will take you to the Quiz Creator page.

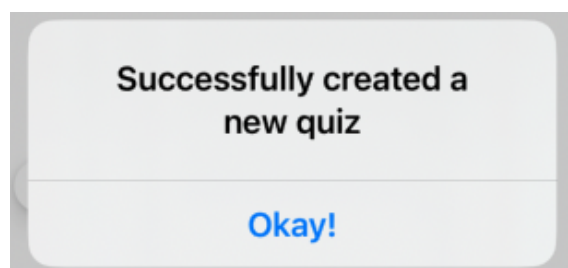

(Note: The Manual Continues on the Next Page)

After clicking the button you will be shown the view seen below. To create a quiz you will first need to enter a name for the quiz in the provided fields. Then using the slider select the number of questions you want to create. This will create a scrollable list of text fields and buttons which you can enter information into and save using the buttons provided. Once you have finished, click the green Create Quiz button to create your quiz.

While in this view remember to read the instructions given in the app itself as if you change the number of questions when you have already saved some make sure to go back and save them again otherwise you won't be able to make a quiz. If you successfully make a quiz you will receive this popup indicating that the process is complete and you can now go and take the quiz you just made and search for it as well.

However if you forgot something or entered something incorrectly the app will show you either one of the following popups instructing you on what to change.

Quiz Taker:

Selecting "Take Quiz" from the Homescreen leads you to a page displaying all available quizzes, including yours and those by others. Scroll through the options and choose a quiz to begin. Once started, you must complete all questions and submit the quiz to return to the Homescreen; there's no option to back out midway.

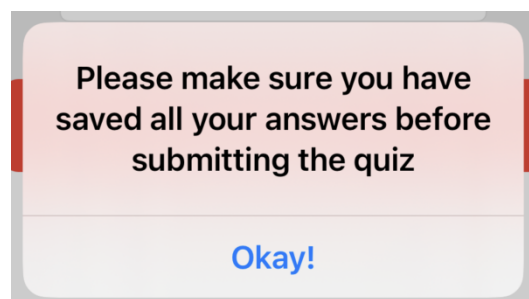

(Note: the manual continues on the next page)

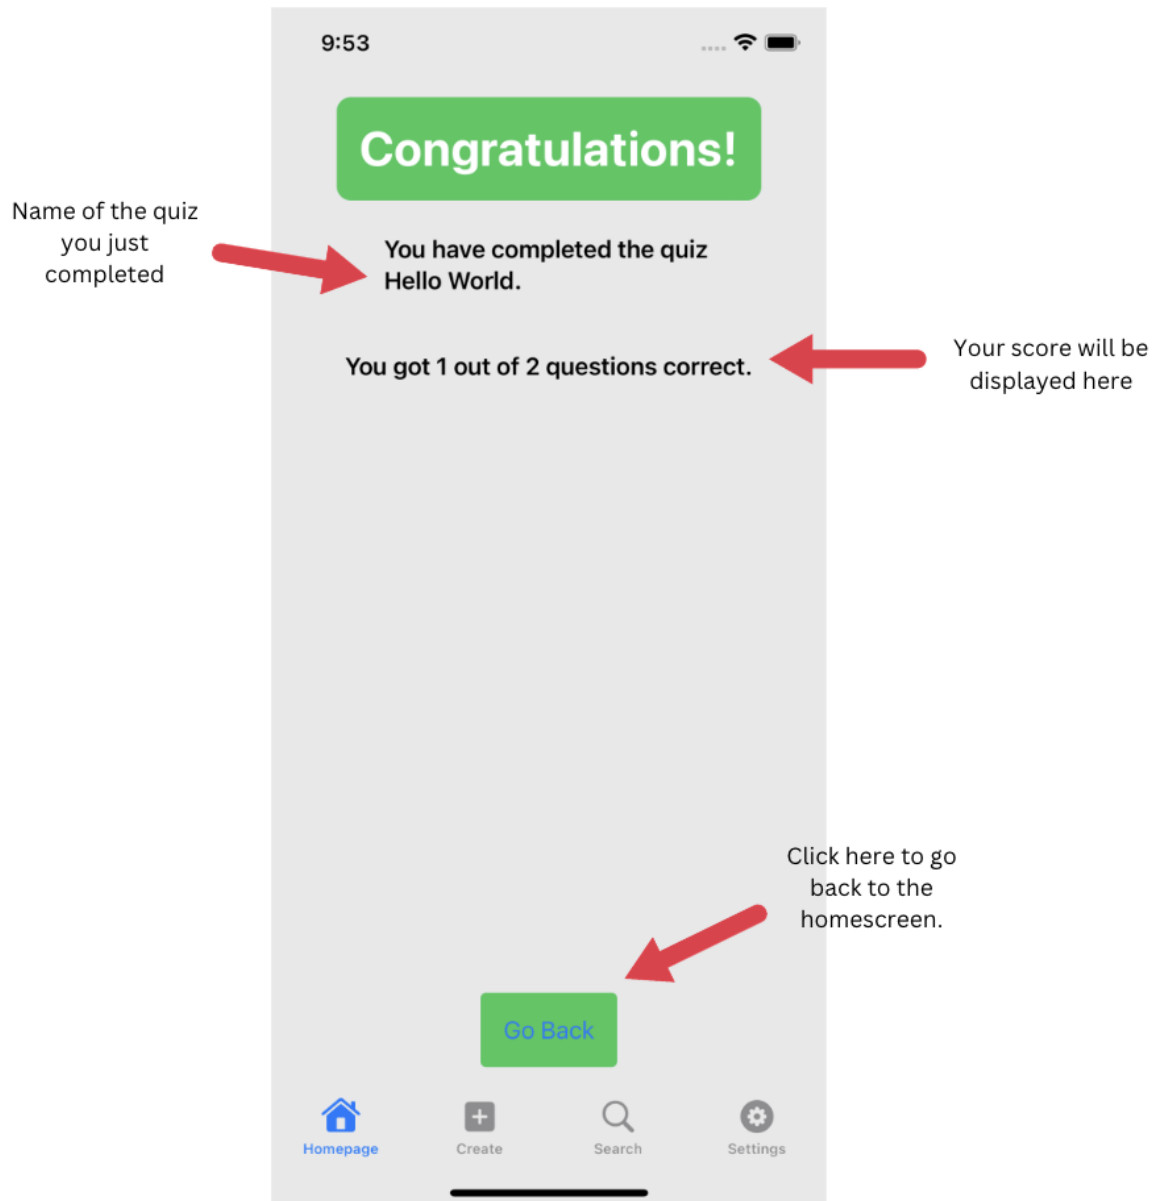

Once at the view of quizzes, click any of the available options to be navigated to a view that lets you take the quiz and scroll through each question. Once you are undertaking the quiz enter your answer in the available text fields and save each answer using the button provided. Once you have finished make sure to go back and check that you have saved each question by clicking each button to make sure it changes from “Save Answer” to “Edit Answer” then press the “Submit Quiz” button. Remember to save all your answers before submitting the quiz

If you haven't saved any answers the program will show you the following error reminding you to save them

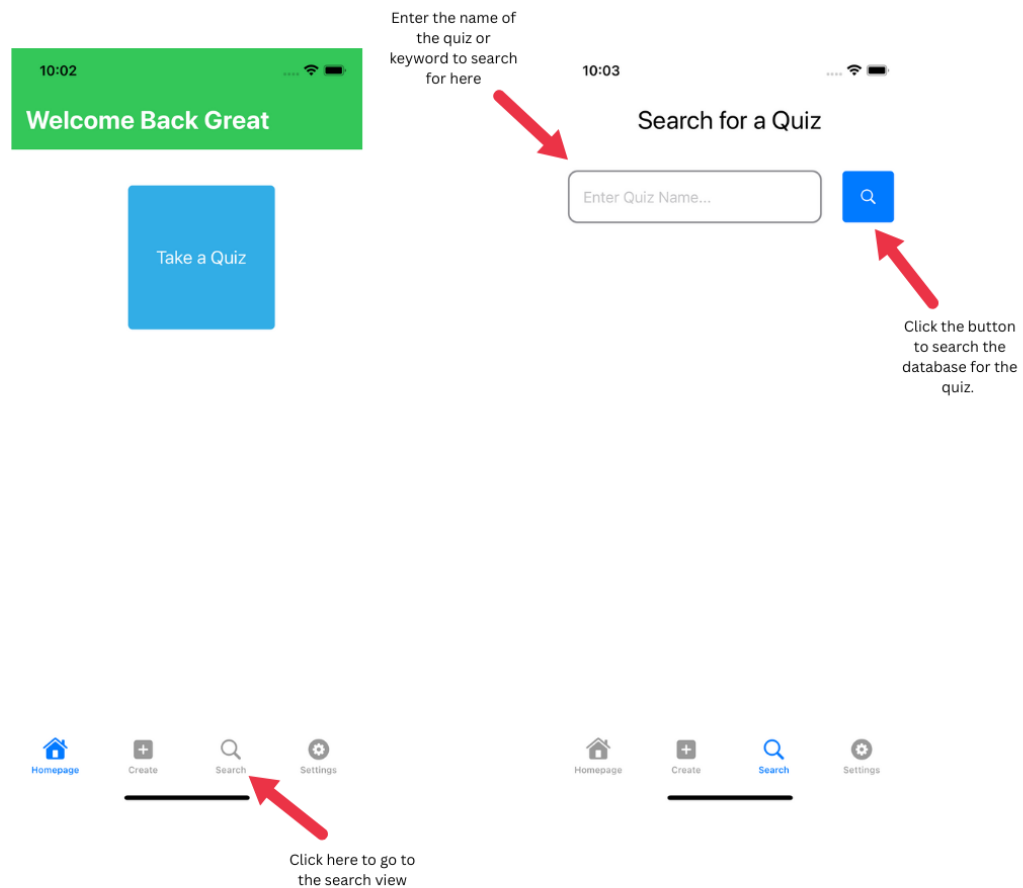

Once you have successfully saved all your answers and submitted the quiz, the app will mark the quiz and show you the page below where you can see your score and go back to the homescreen to take a new quiz.

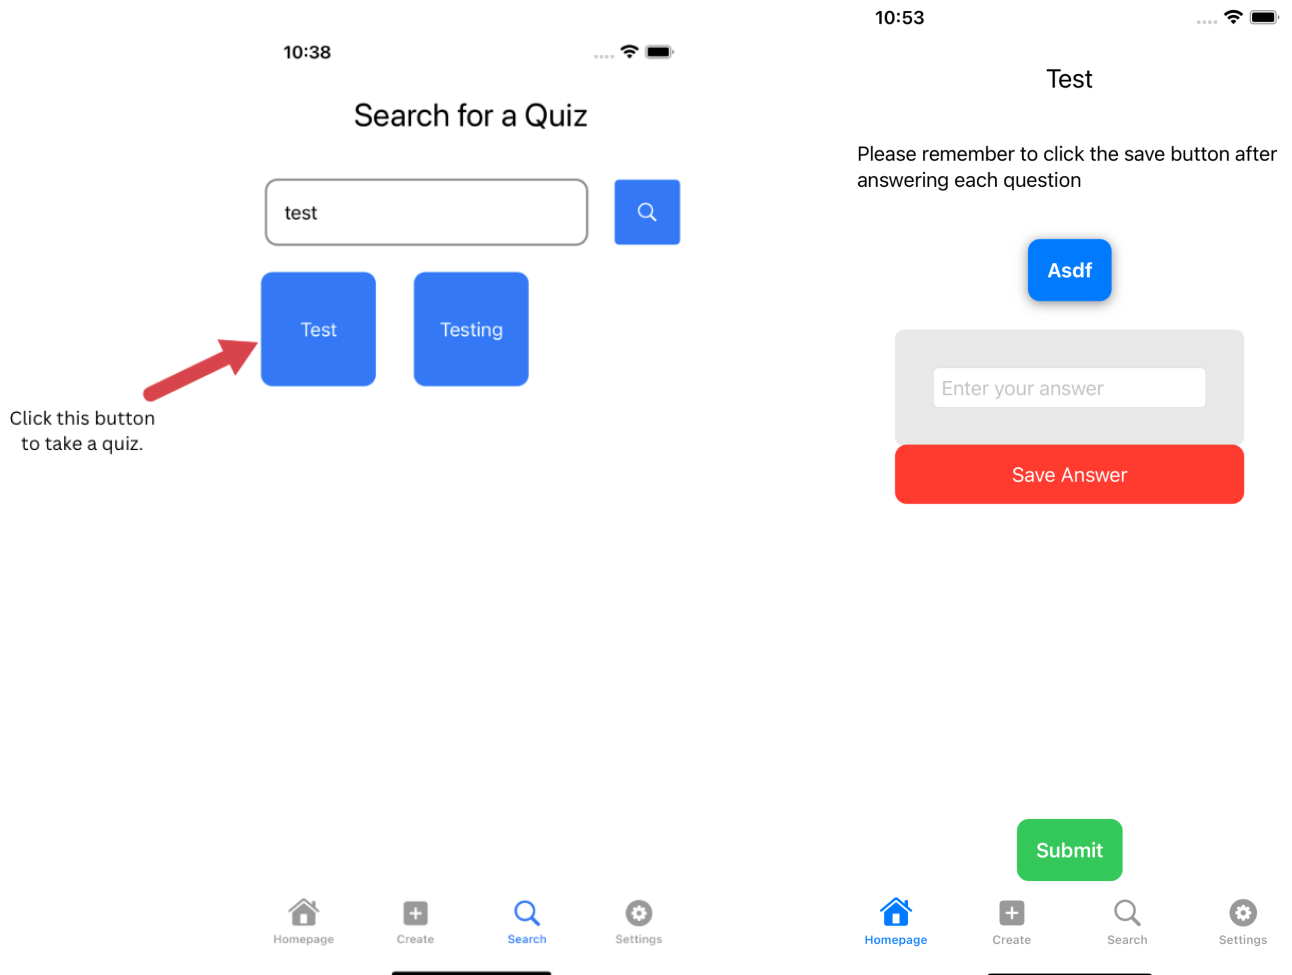

Quiz Search:

From the homescreen or any other view if you click the search icon from the tab bar you will be navigated to the search view. Once at the search view enter the name or keywords of the quiz you want to search for then click the blue search button next to the text field.

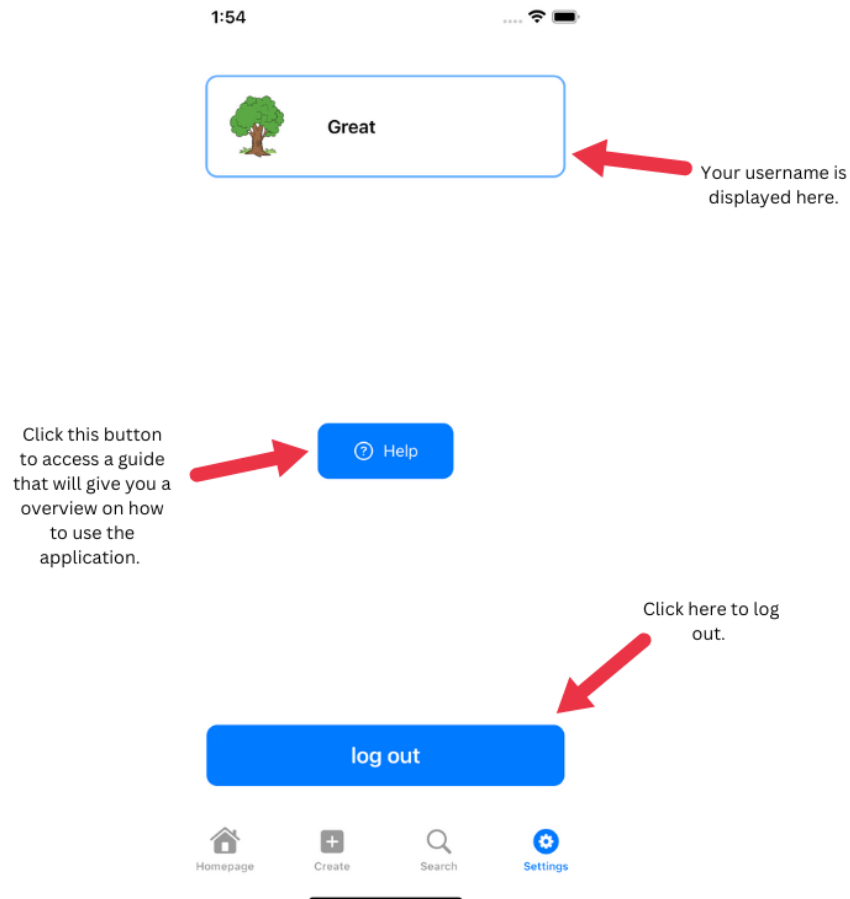

(Note: The Manual continues on the next page)

After you search for a quiz you can click on the box to take you to the Take Quiz page previously shown above.

Settings:

From the homescreen to access the settings page click the gear icon in the bottom right of the screen. Here you can access help in the form of a user guide identical to this one and log out of the application if you so choose.

Quizzic Troubleshooting Guide

Problem	Possible Solutions
Attempting to Sign In displays an error	<ul style="list-style-type: none">• Ensure you are using the correct email address and password• Check that Caps Lock isn't activated by mistake• Check that your password is what you are expecting it to be by typing it into the Email box. This allows you to see what you are typing in• Ensure that your iPhone is connected to a stable internet connection, either through Wi-Fi or cellular data. Poor connectivity can cause authentication issues.• Make sure you have the latest version of Quizzic installed on your device.
Attempting to Sign Up displays an error	<ul style="list-style-type: none">• Ensure that you follow the on screen prompts and enter a valid email address and password.<ul style="list-style-type: none">◦ The on screen checkmark and x mark will let you know if you have entered a valid email or password◦ i.e. Your Password must have at least<ul style="list-style-type: none">■ 10 characters,■ 1 uppercase character■ 1 lowercase character■ 1 number■ 1 symbol.• Ensure that your iPhone is connected to a stable internet connection, either through Wi-Fi or cellular data. Poor connectivity can cause authentication issues.• Make sure you have the latest version of Quizzic installed on your device.• If neither of these help close the app and relaunch as the error may be a one-off glitch.
Attempting to Sign Out displays an error.	<ul style="list-style-type: none">• Ensure that you click the button at the bottom of the settings page to sign out.• Ensure that your iPhone is connected to a stable internet connection, either through Wi-Fi or cellular data.
